Unique Expertise

- Our Program Director, Janice Knebl, DO, MBA, FACOI, FACP and team physicians Amy Moss, DO, and Hedieh Davanloo, MD are all fellowship-trained, board-certified geriatricians. Also, as medical school faculty members, they have access to the most up-to-date information on geriatrics and research in aging.
- Age-related problems are complicated. We use a multidisciplinary professional staff of physicians, social workers, geriatric nurse practitioners, psychologists to thoroughly examine and assess our patients.
- We provide resources, education and support for families and caregivers. In addition, we offer all New Patients the opportunity for a Family Summary Conference following the Evaluation Process.

Comprehensive, Compassionate Care

- We specialize in the care of men and women 65 and older. Many of our patients are frail and suffer from multiple problems while others are healthy and want to maintain health through preventative medical care.
- Our assessments may include a review of medical history and physical health; medications; functional and nutritional status; cognitive, emotional and psychological wellness; social service needs, such as care and safety in the home, social network support, access to resources and planning for long-term care needs.
- We make referrals for adjunct medical services such as specialist exams; psychiatric/ psychological assessment; physical or occupational therapy; dental, sensory deficit evaluations.

Convenience

- We accept referrals from physicians, hospitals, community service provider agencies and caregivers. We also accept self-referrals.
- We accept private insurance, Medicare, Medicaid, Medicare assignment and managed care contracts.
- Our clinic is on the UNTHSC campus in Fort Worth's Cultural District. It is easy to get to and has ample free parking.
- For more information or to schedule a consultation or appointment, please call us at 817-735-2200; 817-735-2617 or 817-735-2677.
