

Legislative Appropriations Request
For Fiscal Years 2016 and 2017

Submitted to the
Governor's Office of Budget, Planning and Policy
and the Legislative Budget Board

by

Revised October 17, 2014

**UNIVERSITY of NORTH TEXAS
HEALTH SCIENCE CENTER at FORT WORTH
LEGISLATIVE APPROPRIATIONS REQUEST for FISCAL YEARS 2016-17**

TABLE OF CONTENTS

Administrator’s Statement	1-6
Organizational Chart	7
Summaries of Request	8-31
Strategy Request	32-72
Rider Revisions and Additions Request	73-75
Exceptional Item Request	76-86
Historically Underutilized Business	87-88
Estimated Funds Outside the GAA	89
10% Biennial Base Reduction Options Schedule	90-96
Summary of Requests for Capital Project Financing.....	97

HIGHER EDUCATION SUPPORTING SCHEDULES:

Schedule 1A: Other Educational and General Income	98-100
Schedule 2: Grand Total Educational, General and Other Funds	101-102
Schedule 3A: Staff Group Insurance Data Elements	103-105
Schedule 4: Computation of OASI	106
Schedule 5: Proportionality and ORP Differential	107
Schedule 6: Constitutional Capital Funding	108
Schedule 7: Personnel	109-111
Schedule 8A: Tuition Revenue Bond Project	112
Schedule 8B: Tuition Revenue Bond Issuance History	113
Schedule 8D: Tuition Revenue Bonds Request by Project	114
Schedule 9: Special Item Information	115-121

Schedules Not Included

Agency Code: 763	Agency Name: UNT Health Science Center	Prepared By: Gail Hebert	Date: August 4, 2014	Request Level: Baseline
<p>For the schedules identified below, the UNT Health Science Center either has no information to report or the schedule is not applicable. Accordingly, these schedules have been excluded from the UNT Health Science Center Legislative Appropriations Request for the 2016-17 biennium.</p>				
Number	Name			
Schedule 3.C.	Rider Appropriations and Unexpended Balances Request			
Schedule 5A-5E	Capital Budget and Supporting Schedules			
Part 6.B.	Current Biennium One-Time Expenditure			
Part 6.C.	Federal Funds Supporting Schedule			
Part 6.D.	Federal Funds Tracking Schedule			
Part 6.E.	Estimated Revenue Collections Support Schedule			
Part 6.F.	Advisory Committee Supporting Schedule			
Part 6.G.	Homeland Security Funding Schedule			
Part 6.J.	Budgetary Impacts Related to Federal Health Care Reform			
Part 6.K.	Budgetary Impacts Related to the Budget Control Act - Sequestration			
Part 7	Administrative and Support Costs			
Schedule 1B	Health-related Institutions Patient Income			
Schedule 3B	Staff Group Insurance Data Elements (UT/A&M)			
Schedule 3C	Group Insurance Data Elements (Community Colleges)			
Schedule 3D	Staff Group Insurance Data Elements – Supplemental (UTMB, UTHSCH, and TTUHSC)			
Schedule 8C	Revenue Capacity for TRB Projects (Sys Admin Only for UT System)			

Administrator's Statement

10/17/2014 12:41:54PM

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

763 University of North Texas Health Science Center at Fort Worth

INSTITUTIONAL VISION

The University of North Texas Health Science Center (UNTHSC) is organized around two institutional principles:

- Our vision: Be the team of choice for education, discovery (research) and health care.
- Our mission: Create solutions for a healthier community.

Interprofessional Education

Our 33-acre campus in the heart of Fort Worth's Cultural District consists of five schools and colleges:

- Texas College of Osteopathic Medicine
- Graduate School of Biomedical Sciences
- School of Public Health
- School of Health Professions
- UNT System College of Pharmacy

UNTHSC emphasizes team-oriented, evidence-based best practices, quality-improvement approaches and informatics to deliver more effective and efficient patient care. Students who experience interprofessional discipline are better prepared to contribute to a culture of patient safety and improved patient outcomes.

With a record-breaking enrollment of 2,145 students in 2013, our academic strength continues to grow in national prominence. As noted by U.S. News & World Report, UNTHSC is ranked:

- 15th for Rural Medicine
- 17th for Family Medicine
- 31st for Primary Care

Our newest school, the UNT System College of Pharmacy, is the first pharmacy school in North Texas and the first to be located on an academic health science center campus. Pre-candidate status was granted by the Accreditation Council for Pharmacy Education (ACPE) in June 2013, allowing the school, comprised of an inaugural 82-member class and 17 faculty, to begin in August 2013. By August 2014, a total of 25 full-time faculty will be on hand to instruct a second class of 100 students. In the increasingly integrated health care delivery model, pharmacists are emerging as integral providers in the continuum of care.

Discovery/Research

We maintained our high level of activity (\$40.8 million in annual research expenditures) despite considerable national cutbacks in funding by the National Institutes of Health (NIH) and other federal agencies. Furthermore, for the first time, we secured funding for a portfolio of projects from the Centers for Medicare and Medicaid (CMS) designed to establish innovative health care delivery models that can deliver on the Institute for Healthcare's Triple Aim: improve the patient's care experience, improve the health of populations, and reduce the per-capita cost of health care.

All of the milestones for our 1115 Healthcare Transformation Waiver programs have been completed on schedule, including the necessary infrastructure requirements needed to ensure the future success of our Delivery System Reform Incentive Payment (DSRIP) projects. We also continue to improve patient care efforts and innovation through participation in the RHP 10 Learning Collaborative. For example, we are a regional provider team within the Care Transitions and Patient Navigation Collaborative, which promotes continuous quality improvement efforts.

Administrator's Statement

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

763 University of North Texas Health Science Center at Fort Worth

Health Care

Through our clinical enterprise, UNT Health, we staff multiple patient offices in Fort Worth and Tarrant County, along with more than 220 providers offering patient care at 49 practice sites. In 2013, UNT Health had more than 580,000 patient encounters.

We specialize in three distinct areas of care:

- Primary care and prevention
- Healthy aging
- Applied genetics

Primary Care and Prevention

Among all Texas medical schools, we have the highest percentage of medical students entering primary care (67%) and the second-highest percentage among ranked medical schools in the country. Of particular note, our Rural Osteopathic Medical Education of Texas (ROME) offers innovative medical education programs that prepare students for life and medical practice in rural environments.

The UNTHSC Pediatric Mobile Clinic is an innovative solution designed to bring much-needed primary care services to kids in under-served areas of Tarrant County. Before establishing this important mobile access point for care, Fort Worth was the only top-twenty city in the nation without a mobile clinic. By bringing an experienced team of bilingual UNTHSC clinical professionals to schools, community centers, churches, and community organizations throughout Fort Worth, the Pediatric Mobile Clinic will help families overcome the barriers to health care access by providing care and prevention services aboard a state-of-the-art mobile medical unit.

Numerous studies link better nutrition with better health by preventing the onset of chronic conditions such as diabetes, heart disease and respiratory ailments. "Culinary Medicine" at UNTHSC is the first class of its kind in Texas, pairing medical students with Nutrition Science students from Texas Christian University (TCU) in a hands-on curriculum taught by faculty from both schools that integrates nutrition and eating behaviors to prevent the onset of chronic diseases and treat existing chronic conditions as patients receive "prescriptions" for healthy cooking techniques.

Healthy Aging

We train medical students, graduates and allied health students, as well as practicing physicians, on how to better care for an aging population through the Reynolds Geriatric Education and Training in Texas (GET-IT) Program and the Seniors Assisting in Geriatric Education (SAGE) program, which pairs first- and second-year medical students with senior mentors in the community. Cited as one of the "5 Subjects Future Doctors Need to Learn" (per US News & World Report, 2014 medical education special edition), this geriatrics training program is being expanded to include additional students from various allied health professions for a fuller complement of better-trained future health care providers.

Our Institute for Aging and Alzheimer's Disease Research is a leader in both aging and Alzheimer's research, making significant advances in prevention, treatment and care. UNT Health, the physician practice group of the UNT Health Science Center, is a leader in caring for older adults and is committed to improving the physical and mental function of our patients through the Gerontology Assessment and Planning program and the Geriatrics Division, which provides continuum care, including nursing home care, assisted-living care, house calls, hospice and palliative medicine.

We are also a participant in the Texas Alzheimer's Research and Care Consortium (TARCC), a collaboration between six of the state's leading medical research institutions to improve early diagnosis, treatment, and prevention of Alzheimer's disease by collaborating on state-funded Alzheimer's research and contributing genetic

and blood biomarker data to a shared Texas Alzheimer's DataBank.

Applied Genetics

The Institute of Applied Genetics is the overarching entity for the practical genetics work at the UNT Health Science Center and is comprised of three centers: (1) Human Identification, (2) Biosafety and Biosecurity, and (3) Computational Genomics.

The Center for Human Identification is the largest of the centers and is dedicated to applying genetics (i.e., forensic DNA typing) to assist in solving crimes, identifying missing persons, and combatting human trafficking. One emerging and already successful endeavor is the DNA ProKids program, an international program that utilizes genetic testing to fight human trafficking. This program has reunited approximately 700 children with their families in the past five years.

The Center for Biosafety and Biosecurity focuses on infectious diseases (either encountered naturally or via terrorism) and the genetic predisposition of individuals that impacts diagnostics and therapeutics. For example, predictive risk DNA testing is being developed for personalized medicine and molecular autopsies.

The Center for Computational Genomics propels bioinformatics, statistics and computer technology to extract more data in order to provide greater insight needed for solving genetic problems, as well as for database work. This provides support for the other two centers that generate the genetic data.

Additionally, we manage NamUs –the National Missing and Unidentified Persons System -- for the US Department of Justice. A national centralized repository and resource center for missing persons and unidentified decedent records, NamUs is a free, online system that can be queried by medical examiners, coroners, law enforcement officials and the public from all over the country in hopes of resolving cases.

Creating Solutions for Healthier Communities

Our vision for the future, to “be the team of choice for education, discovery and health care,” includes the continuation of numerous successful health-related programs. Here are just a few examples:

- Joint Admissions Medical Program (JAMP) - aimed at helping undergraduate students from economically-disadvantaged backgrounds with accessing opportunities in health care.
- FitWorth - a family-focused movement centered around educating and inspiring the community in making healthier decisions by rallying employers, schools, hospitals, government officials, faith communities, non-profit organizations and retailers around local activities to halt the upward trend of obesity in our community.
- Interprofessional Education - created in 2012, will expand its successful efforts with the new Center for Interprofessional Education, Practice and Research, which will disseminate best practices for preparing our students for a more team-based approach to health care.
- Graduate Medical Education (GME) - will help offset the continuing primary care physician shortage, our GME program continues to grow, with the addition of two new affiliates, which are expected to add four family medicine residents in FY 2015-2016, eight in FY 2016-2017, and six internal medicine residents in FY 2016-2017. At our existing hospital base, we added eight new positions in FY 2014-2015.

FUNDING PRIORITIES FOR HEALTH-RELATED INSTITUTIONS

Administrator's Statement

10/17/2014 12:41:54PM

84th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

763 University of North Texas Health Science Center at Fort Worth

The UNTHSC continues to experience a full complement of student enrollment. As such, we strongly encourage an increase in the investment in higher education and support the Health Related Institutions (HRI) Formula Advisory Committee's formula funding recommendations contained in the "Texas Public Health Related Institutions Funding Formulas" report. We believe that providing a stable level of base funding for higher education will ultimately contribute to the economic vitality of the State by having a highly-educated workforce.

With the College of Pharmacy entering its second year of pre-candidate accreditation, UNTHSC respectfully requests full formula funding for this school.

Furthermore, sustained funding for Graduate Medical Education (GME) Expansion, Texas Alzheimer's Research and Care Consortium (TARCC), Joint Admission Medical Program (JAMP), Family Practice Residency Program, and Primary Care Innovation Grant Program, is critical for the continued success of these programs. The funding for all of these programs is necessary for institutions to continue to effectively address the health care needs of the State.

Due to the financial difficulty the 81st Legislature was facing, the Family Medicine Residency Training program suffered deep budget cuts which eliminated the funding for the program located at the Faculty Development Center in Waco. Recognizing this program as a critical need of the State, UNTHSC assumed conservatorship and provided \$300,000 annually to maintain this program. Therefore, UNTHSC respectfully request full funding necessary to support this program.

10% Biennial Base Reduction Exercise

Due to the limited number of strategies to which we can apply our 10% reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need. Furthermore, our Special Item programs are included in the 10% reduction; as a result, this reduction would negatively impact the services, advancements and outcomes of these significant programs.

While the UNTHSC is sensitive to the competitive environment for State funding across Texas during this favorable economic climate, we respectfully request that no additional reductions be made to our appropriations.

EXCEPTIONAL ITEM FUNDING PRIORITIES

1. TRB Debt Service: Interdisciplinary Research Building – FY 2016 \$ \$8,439,465 & FY 2017 \$8,439,465

This project will construct a building of approximately 150,000 gross square feet for the UNTHSC campus. It will support the growth of clinical and translational research and the associated training programs. The facility is planned to be a multi-story building with research laboratories, vivarium, classrooms, teaching labs, study areas, seminar rooms, multimedia learning, and associated student learning spaces. Faculty and administrative offices will also be included in this building with office suites, meeting rooms and collaborative work areas. This building will support both the academic and research initiatives for the University of North Texas System College of Pharmacy (UNTSCP). In addition, this building will house several of the Health Institutes of Texas, including the Institute for Aging and Alzheimer's Disease (IAADR), the Institute for Cancer Research (ICR), the Cardiovascular Research Institute (CRI), and the Texas Prevention Institute (TPI), which includes within it the Texas Center for Health Disparities (TCHD), the Center for Community Health (CCH) and the Primary Care Research Institute (PCRI). This building will catalyze the inter-professional activities required for successful team science and for providing training of students in a translational science environment.

Automated Budget and Evaluation System of Texas (ABEST)

763 University of North Texas Health Science Center at Fort Worth

2. Center for Genome Guided Personalized Medicine: – FY 2016 \$4,000,000 & FY 2017 \$4,000,000

Compelling evidence now shows that differences in genetic makeup affect both the risk of and response to therapy for major killer diseases. The terms pharmacogenetics and pharmacogenomics are often used to describe this new field of medicine that offers great promise for personalizing health care. Diseases where genetic differences affect the risk and response to therapy of major killer diseases include cancer, high blood pressure, heart disease, neurodegenerative diseases, pain management, depression, and other psychiatric conditions. While genome guided personalized medicine has not yet reached wide application in health care, the rapidly accumulating knowledge in this area clearly demonstrates it will have a major future impact on health care. Described here is an opportunity to combine the efforts of the UNT Health Science Center’s international renowned Institute of Applied Genetics with the UNT System College of Pharmacy to develop a Center for Genome Guided Personalized Medicine which will be well positioned to make unique research discoveries, focused educational impact, and significant changes to how health care is delivered to each patient in a very accurate and customized manner based upon the individual patient’s specific genetic makeup.

3. Institute for Patient Safety and Preventable Harm – FY 2016 \$2,000,000 & FY 2017 \$2,000,000

The UNTHSC, in collaboration with JPS and TCU, will create an Institute for Patient Safety and Preventable Harm. The overall objective of the Institute will be to develop and implement strategies to decrease adverse events that occur when patients receive health care and minimize medical errors. In 1999, the Institute of Medicine identified that 98,000 patients were dying each year in U.S. hospitals due to preventable harm. Fifteen years later, in 2014, we now have an estimated 300,000 patient deaths each year due to preventable harm. Preventable errors are responsible for a very large percentage of the annual U.S. health care expenditure. As technological advances continue to be implemented in the care environment, the speed and complexity of care will increase as will the errors. In the Institute for Patient Safety and Preventable Harm we will focus resources on conducting new research, making changes to health care provider education, and developing new methods of patient care delivery in order to combat this growing problem. The Institute will work to make new discoveries while building on existing research in order to identify and implement new care delivery strategies that will enhance patient safety in all care settings. More specifically, the Institute will utilize the research, education, and patient care principles found in a number of safe practice disciplines including LEAN, interprofessional team education (IPE), interprofessional team practice (IPP), pharmacist led medication management, and specific lessons of high reliable organizational practice and design. (HRO).

THE UNIVERSITY OF NORTH TEXAS SYSTEM BACKGROUND

The University of North Texas (UNT) System, of which UNTHSC is a part, is governed by a board of regents appointed by the governor. Lee F. Jackson is the chancellor of the UNT System.

BACKGROUND CHECKS

UNT System’s Office of Human Resources will provide background checks on all new employees, as well as student employees as allowed by the Texas Education Code, Section 51.215 and the Texas Government Code, Section 411.094.

SUMMARY

Under the leadership of UNTHSC President Michael Williams, DO, MD, FACHE, we are dedicated to serving the community as a values-based organization committed

METHOD OF FINANCING	Exp 2013	Est 2014	Bud 2015	Req 2016	Req 2017
<u>GENERAL REVENUE FUND - DEDICATED</u>					
Regular Appropriation from MOF Table (770) (2012-13 GAA)	\$7,279,165	\$0	\$0	\$0	\$0
Revised Receipts	\$524,809	\$0	\$0	\$0	\$0
Regular Appropriation from MOF Table (770) (2014-15 GAA)	\$0	\$6,214,778	\$6,131,527	\$0	\$0
Revised Receipts	\$0	\$2,199,068	\$2,533,223	\$0	\$0
Comments: For FY2014, the increase in revised receipts is due to increasing enrollment levels in all of the institution's academic programs including the College of Pharmacy, which enrolled its first cohort of students during this fiscal year. In FY2015, the increase in revised receipts is primarily due to the enrollment of the second cohort of students in College of Pharmacy.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per FTSE is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The primary goals are the continued enrollment growth, expansion of clinical operations at both private and public hospitals through the pursuit of opportunities provided by provisions in the Affordable Care Act, and expansion of the research conducted by the clinical departments through the establishing of Phase 1 clinical trials capabilities.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The formula for this strategy is based on weighted biomedical student full time equivalent. The rate per FTSE is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Concerted efforts are being made to increase diversity of students by offering research opportunities to local high school and undergraduate students and use these programs to facilitate recruitment of minorities and other underserved groups. Retention of students has been a focus through grants used towards stipends for PhD students. Faculty recruitment and development has been increased to meet the demands of a growing student body and increase research funding.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The formula for this strategy is based on weighted public health student full time equivalent. The rate per FTSE is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

It is clear that a key component of health care in the future will derive from the integration of public health and medicine. UNT Health Science Center seeks to lead this movement with a focus on integrating public health and primary care medicine. Continued development of the School of Public Health will foster enhanced research and service capabilities to provide guidance in the effort to enhance population-based health care in North Central Texas. Faculty recruitment and development has been increased to meet the demands of a growing student body and increase research funding.

FULL TIME EQUIVALENT POSITIONS:		42.7	59.1	59.1	60.3	60.3

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The formula for this strategy is based on weighted allied health student full time equivalent. The rate per FTSE is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Demand remains strong for Physician Assistants to meet health care delivery needs at lower costs. In recent years, the Physician Assistant Programs implemented an independent PA curriculum to address educational needs of PA students who shared some classes with the medical students in the past.

UNTHSC currently offers a Doctor of Physical Therapy (DPT) program which prepares students as a Doctor of Physical Therapy in one of today's fastest growing and most rewarding health professions.

(1) (1)

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Research Enhancement formula allocates a base amount to each institution in addition to a percent of the research expenditures as reported to the Texas Higher Education Coordinating Board. These funds are used to support the research activities of the institution.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The 77th Texas Legislature approved Tuition Revenue Bonds to build a new Center for BioHealth at UNT Health Science Center. The new building opened in July 2004. The additional space provided the Health Science Center the infrastructure to help support its expansion of research as well as total federal funding of biotechnology and research in Texas. Research enhancement initiatives include: increasing interactions with local universities with the ultimate goal of developing new collaborative research projects; further development of training for faculty and staff in the area of research compliance; enhancing the use of information technology to comply with requirements of the institution (new Enterprise Information System) and national funding entities (electronic grant submissions) and to provide managerial information more easily; and to continue the full compliance program of Responsible Conduct of Research (RCR).

FULL TIME EQUIVALENT POSITIONS:		95.4	104.6	104.6	107.7	107.7

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Ongoing growth and development are fundamentally tied to E&G Space Support. Thus, the prosperity of the institution, in a fundamental way, depends on continuity of E&G Space Support funding. Formula Funding for infrastructure support has not increased in line with increases in utility costs.

(1) - Formula funded strategies are not requested in 2016-17 because amounts are not determined by institutions.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

Fulfillment of the institutional mission demands state-of-the-art facilities for education, research, and service. Tuition Revenue Bonds are used to develop these facilities. The long-term goal is to create a cohesive, community-recognized campus that enhances student life, learning and fosters greater recognition of the presence of the institution within the community. Tuition bonds were authorized by past legislative sessions for these important projects: completion of Primary Care Center, a new parking garage, the Center for BioHealth building, and the Public Health Education Building. The Primary Care Center was completed in Fall 2000. The new parking garage was completed in Fall 2001. The Center for BioHealth opened in July 2004. The Medical Education and Training building opened in May 2010.

The mission of the Alzheimer’s Diagnostic and Treatment Center is threefold: (1) to expand clinical identification, treatment and care of persons with Alzheimer’s and related memory disorders through the Geriatrics Section/Department of Internal Medicine’s Gerontology Assessment and Planning Program (GAP); (2) to facilitate basic science and translational research into the origins and treatment of Alzheimer’s; and (3) to establish productive links between Alzheimer’s work in geriatrics clinical care, pharmaceutical clinical trials, translational science, in basic science laboratories, and in public health.

UNT Health Science Center holds two NIH program project grant awards in aging and participates in several clinical trials in aging and Alzheimer’s.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

STRATEGY DESCRIPTION AND JUSTIFICATION:

The primary applications of DNA technology at the UNT Health Science Center include paternity testing, forensic assessment, diagnosis of Lyme Disease, and identification of missing persons. Additionally, faculty specializing in gene regulations and genetic polymorphisms are involved in basic research understanding how genes influence pathology and to develop new gene therapies. A professional master’s degree in biomedical sciences with a specialization in Forensic Genetics has been established and has become the primary source of new DNA forensic analysts for crime laboratories within Texas.

The UNTHSC DNA Laboratory is a rich essential resource for Texans, providing genetic assessment services in paternity, Lyme Disease and forensic applications including missing persons. A doctoral degree program has been implemented with a discipline in Forensic Genetics.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Center for Genome Guided Personalized Medicine

Compelling evidence now shows that differences in genetic makeup affect both the risk of and response to therapy for major killer diseases. Diseases where genetic differences affect the risk and response to therapy of major killer diseases include cancer, high blood pressure, heart disease, neurodegenerative diseases, pain management, depression, and other psychiatric conditions. Described here is an opportunity to combine the efforts of the UNT Health Science Center’s international renowned Institute of Applied Genetics with the UNT System College of Pharmacy to develop a Center for Genome Guided Personalized Medicine which will be well positioned to make unique research discoveries, focused educational impact, and significant changes to how health care is delivered to each patient in a very accurate and customized manner based upon the individual patient’s specific genetic makeup.

Institute for Patient Safety and Preventable Harm:

The UNTHSC, in collaboration with JPS and TCU will create an Institute for Patient Safety and Preventable Harm. The overall objective of the Institute will be to develop and implement strategies to decrease adverse events that occur when patients receive health care and minimize medical errors. In the Institute for Patient Safety and Preventable Harm we will focus resources on conducting new research, making changes to health care provider education, and developing new methods of patient care delivery in order to combat this growing problem.

Center for Genome Guided Personalized Medicine:

The UNTHSC has positioned itself to become a leader in personalized medicine utilizing the strengths of the current Institute of Applied Genetics (IAG). It functions as an interdisciplinary research institute and was founded in 2009.

This development strategy provides an opportunity for UNTHSC to make major and unique contribution to the development of personalized medicine. The opportunity to recruit promising investigators with primary interests in connecting genetic differences to disease risk and therapy provides the opportunity to leverage both its strengths and opportunities.

Institute for Patient Safety and Preventable Harm:

The development of a team of faculty and staff as Master Trainers with multiple training sessions have included the Department of Family Medicine, Division of Geriatrics and TCOM students.

UNTHSC has initiated a formal relationship with JPS Hospital to collaborate on education, patient care, patient safety and research.

The leadership of the Institute will be comprised of individuals from the UNTHSC, JPS and TCU at all levels from each of the three institutions and are committed to creating a culture of safety and will coordinate patient safety efforts.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Tobacco funds are used for education, research and patient care programs at the UNT Health Science Center. These funds are used to enhance areas of existing expertise at the health science center with special focus on cardiovascular disease, cancer, geriatrics (dementia) and public health. Community education and public health programs have been developed to address the problem of tobacco use. Research seed grants were awarded several years ago; we now are reaping the benefits of these grants as demonstrated by the highest growth rate in research expenditures among all health-related institutions.

DESCRIPTION / JUSTIFICATION:

This project will construct a building of approximately 150,000 gross square feet for the UNTHSC campus. It will support the growth of clinical and translational research and the associated training programs. The facility is planned to be a multi-story building with research laboratories, vivarium, classrooms, teaching labs, study areas, seminar rooms, multimedia learning, and associated student learning spaces. Faculty and administrative offices will also be included in this building with office suites, meeting rooms and collaborative work areas. This building will support both the academic and research initiatives for the University of North Texas System College of Pharmacy (UNTSCP). In addition, this building will house several of the Health Institutes of Texas, including the Institute for Aging and Alzheimer's Disease (IAADR), the Institute for Cancer Research (ICR), the Cardiovascular Research Institute (CRI), and the Texas Prevention Institute (TPI), which includes within it the Texas Center for Health Disparities (TCHD), the Center for Community Health (CCH) and the Primary Care Research Institute (PCRI). This building will catalyze the inter-professional activities required for successful team science and for providing training of students in a translational science environment.

The debt service is calculated assuming a 20-year level of debt at 6 percent interest.

Agency name:

University of North Texas Health Science Center at Fort Worth

CODE	DESCRIPTION	Excp 2016	Excp 2017
------	-------------	-----------	-----------

Major accomplishments to date and expected over the next two years: See Justification

Year established and funding source prior to receiving special item funding: N/A

Formula funding: None

Non-general revenue sources of funding: None

Consequences of not funding: Our researchers have contributed to major discoveries now changing the face of health care and health care delivery. This special item request will provide these researchers with the facilities necessary to continue to build upon past successes and develop new health care innovations. A number of start-up companies owe their beginnings to the solid relationship between the Health Science Center and TECH Fort Worth, a medical science and technology incubator, and to these entities' commitment to bring scientific discovery to the marketplace. Continued delivery of successful research outcomes from Health Science Center laboratories will help build both a healthier Texas citizenry and economy.

The State's Return on Investment (ROI):

Based on current extramural research funding obtained by our research faculty, the addition of 35 new faculty members should bring \$10-15 million per year in research funding to the Health Science Center and provide an even larger economic impact to our region. However, these additional faculty members need lab space in which to work and research education space in which to teach. In addition to economic benefit, successful research findings at the Health Science Center will build a solid foundation to create real solutions for the citizens of Texas that will improve health. We are the state's fastest growing health science center in terms of research expenditures and national funding, with the best return on investment for federal-to-state funding ratios. Additional research education space in which our researchers can continue their work will perpetuate our current cycle of successful research outcomes.

DESCRIPTION / JUSTIFICATION:

Compelling evidence now shows that differences in genetic makeup affect both the risk of and response to therapy for major killer diseases. The terms pharmacogenetics and pharmacogenomics are often used to describe this new field of medicine that offers great promise for personalizing health care. Diseases where genetic differences affect the risk and response to therapy of major killer diseases include cancer, high blood pressure, heart disease, neurodegenerative diseases, pain management, depression, and other psychiatric conditions. While genome guided personalized medicine has not yet reached wide application in health care, the rapidly accumulating knowledge in this area clearly demonstrates it will have a major future impact on health care. Described here is an opportunity to combine the efforts of the UNT Health Science Center's international renowned Institute of Applied Genetics with the UNT System College of Pharmacy to develop a Center for Genome Guided Personalized Medicine which will be well positioned to make unique research discoveries, focused educational impact, and significant changes to how health care is delivered to each patient in a very accurate and customized manner based upon the individual patient's specific genetic makeup.

CODE DESCRIPTION

Excp 2016

Excp 2017

Major accomplishments to date and expected over the next two years: See Justification

Year established and funding source prior to receiving special item funding: N/A

Formula funding: None

Non-general revenue sources of funding: None

Consequences of not funding: The UNTHSC has positioned itself to become a leader in personalized medicine utilizing the strengths of the current Institute of Applied Genetics (IAG). It functions as an interdisciplinary research institute and was founded in 2009. The IAG is comprised of three centers: Center for Human Identification (CHI), Center for Biosafety and Security (CBB), and Center for Computational Genomics (CCG) which together support professional research, training, and service diagnostics relying heavily on genetics, genomics, microbiology, molecular biology, biostatistics, bioinformatics, and other related disciplines. In a relatively short time, the IAG has become a primary resource for genomics research and diagnostics.

The UNT System College of Pharmacy began operations in 2012 and represents an emerging program at the Health Science Center. It is the first Pharmacy program based in the DFW metropolitan area of over 6 million residents. Although a young program, it has already established vigorous research and education programs and is in the process of launching health care delivery focused on providing cutting edge medication management in a team health care model. A number of College faculty provide expertise in both basic and clinical aspects of personalized medicine. Dr. Mike Jacobson, Dean of the College, brings considerable experience to the effort, having played a leading role in the development of PARP inhibitors for treatment/prevention of BRCA cancers. Contributing to the development of personalized medicine represents a strategic aim of the College.

This strategy provides an opportunity for UNTHSC to make major and unique contribution to the development of personalized medicine.

DESCRIPTION / JUSTIFICATION:

The UNTHSC, in collaboration with JPS and TCU will create an Institute for Patient Safety and Preventable Harm. The overall objective of the Institute will be to develop and implement strategies to decrease adverse events that occur when patients receive health care and minimize medical errors. In 1999, the Institute of Medicine identified that 98,000 patients were dying each year in U.S. hospitals due to preventable harm. Fifteen years later, in 2014, we now have an estimated 300,000 patient deaths each year due to preventable harm. Preventable errors are responsible for a very large percentage of the annual U.S. health care expenditure. As technological advances continue to be implemented in the care environment, the speed and complexity of care will increase as will the errors. In the Institute for Patient Safety and Preventable Harm we will focus resources on conducting new research, making changes to health care provider education, and developing new methods of patient care delivery in order to combat this growing problem. The Institute will work to make new discoveries while building on existing research in order to identify and implement new care delivery strategies that will enhance patient safety in all care settings. More specifically, the Institute will utilize the research, education, and patient care principles found in a number of safe practice disciplines including LEAN, interprofessional team education (IPE), interprofessional team practice (IPP), pharmacist led medication management, and specific lessons of high reliable organizational practice and design. (HRO).

Year established and funding source prior to receiving special item funding: N/A

Formula funding: None

Non-general revenue sources of funding: None

Consequences of not funding: The development of a team of faculty and staff as Master Trainers with multiple training sessions have included the Department of Family Medicine, Division of Geriatrics and TCOM students.

UNTHSC has initiated a formal relationship with JPS Hospital to collaborate on education, patient care, patient safety and research.

Our Institution has established an Interprofessional Education Curriculum that includes students training to be physicians, nurses, physician assistants and pharmacists, as well as public health students. This health care team of the future is learning to work together to improve patient safety and care. Moreover, UNTHSC has created a partnership with TCU to provide interprofessional educational activities, involving nursing, dietetics, social work and speech and language pathology students from TCU.

The leadership of the Institute will be comprised of individuals from the UNTHSC, JPS and TCU at all levels from each of the three institutions and are committed to creating a culture of safety and will coordinate patient safety efforts.

	Total Expenditures		17.8%		\$10,009,303	\$56,356,277		15.4%		\$7,491,098	\$48,715,782

B. Assessment of Fiscal Year 2012 - 2013 Efforts to Meet HUB Procurement Goals

Attainment:

The University of North Texas Health Science Center (UNTHSC) attained or exceeded 3 of 5* , or 60%, of the applicable statewide HUB procurement goals in FY 2012.

UNTHSC attained or exceeded 2 of 5*, or 40%, of the applicable statewide HUB procurement goals in FY 2013.

*Since the category of Heavy Construction is not applicable to UNT, only 5 categories have been considered in this calculation.

Applicability:

The category of Heavy Construction is not applicable to the agency's operations because UNTHSC did not have programs or projects related to this field.

Factors Affecting Attainment:

UNTHSC makes many specialized purchases throughout the fiscal year of scientific equipment for various labs and research on campus. Professional services and other services often require specialized knowledge, skills and experience. Due to the specialization required, there are few, if any, HUB vendors in these fields.

However, the agency made significant progress from the previous reporting periods in the areas of Building Construction, Special Trades, and Other Services for FY 2012.

"Good-Faith" Efforts:

The agency made the following good faith efforts to comply with statewide HUB procurement goals:

- Made appropriate updates to HUB website
- Continued in-reach program meeting with departments to discuss HUB program and vendors

6.A. Historically Underutilized Business Supporting Schedule

Date: 10/17/2014
Time: 12:41:59PM

Agency code: 763 Agency name: University of North Texas Health Science Center at Fort Worth

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2016	2017	Biennial Total	2016	2017	Biennial Total	

1 Workers Compensation Insurance

Category: Across the Board Reductions

Item Comment: Due to the limited number of strategies to which we can apply our "Targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need. Furthermore, our Special Item programs are included in the 10% reduction; as a result, this reduction would negatively impact the services, advancements and outcomes of these significant programs.

Strategy: 1-2-2 Workers' Compensation Insurance

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$7,895	\$7,895	\$15,790
General Revenue Funds Total	\$0	\$0	\$0	\$7,895	\$7,895	\$15,790
Item Total	\$0	\$0	\$0	\$7,895	\$7,895	\$15,790

FTE Reductions (From FY 2016 and FY 2017 Base Request)

2 Lease of Facilities

Category: Across the Board Reductions

Item Comment: Due to the limited number of strategies to which we can apply our "Targeted" reduction, we chose to reduce all non-formula strategies, which were funded directly by the appropriations provided by the Legislature, by an equal amount of 10%. We believe applying a significant cut to any particular strategy would jeopardize the operational effectiveness of each specific need. Furthermore, our Special Item programs are included in the 10% reduction; as a result, this reduction would negatively impact the services, advancements and outcomes of these significant programs.

Strategy: 3-2-2 Lease of Facilities

General Revenue Funds

1 General Revenue Fund	\$0	\$0	\$0	\$4,630	\$4,630	\$9,260
General Revenue Funds Total	\$0	\$0	\$0	\$4,630	\$4,630	\$9,260

Project Description

This project will construct a building of approximately 150,000 gross square feet for the UNTHSC campus. It will support the growth of clinical and translational research and the associated training programs. The facility is planned to be a multi-story building with research laboratories, vivarium, classrooms, teaching labs, study areas, seminar rooms, multimedia learning, and associated student learning spaces. Faculty and administrative offices will also be included in this building with office suites, meeting rooms and collaborative work areas. This building will support both the academic and research initiatives for the University of North Texas System College of Pharmacy (UNTSCP). This building will catalyze the inter-professional activities required for successful team science and for providing training of students in a translational science environment. To meet our institutional needs, we are requesting \$96.8 million for a 150,000-square-foot research building.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 1 **ALZHEIMER'S DIAGNOSTIC & TREATMENT CENTER**

(1) Year Special Item: 2002
Original Appropriations: \$500,000

(2) Mission of Special Item:

The mission of the Alzheimer's Diagnostic and Treatment Center is threefold: (1) to expand clinical identification, treatment and care of persons with Alzheimer's and related memory disorders through the Geriatrics Section/Department of Internal Medicine's Gerontology Assessment and Planning Program (GAP); (2) to facilitate basic science and translational research into the origins and treatment of Alzheimer's; and (3) to establish productive links between Alzheimer's work in geriatrics clinical care, pharmaceutical clinical trials, translational science, in basic science laboratories, and in public health.

UNT Health Science Center holds two NIH program project grant awards in aging and participates in several clinical trials in aging and Alzheimer's.

In 2012, 11.0% of the Texas population was aged 65 or older; with total growth expected to more than double by year 2040. The number of people with dementia will increase with the aging of the population. Geriatrics is a Center of Excellence at UNTHSC. The institution is well-equipped to expand its work in Alzheimer's.

(3) (a) Major Accomplishments to Date:

Integrated Geropsychiatry and Geriatrics Neuropsychology's "Memory Disorders" Program into the Geriatrics Section

Participated in the Texas Alzheimer's Research and Care Consortium (TARCC)

Integrated the Translational Aging and Alzheimer's Team lead by Sid O'Bryant, PhD who has established the HABLE (Healthy Aging Brain in Latino Elders) program.

Translational Research:

Healthy Brain Aging in Mexican Americans

Development of Useful Estrogen-Based Neuroprotectants to identify neuroprotectant compounds, some of which will enter clinical trials– various pharmaceutical companies

Texas Higher Education Coordinating Board, Advance Technology Program "Development of Novel Estrogens for Brain Protection" – This grant will complete final preclinical assessments of two novel estrogens for brain protection.

Discovery of Effective Treatment for and Prevention of Stroke- and Nerve Gas-Related Brain Damage (U.S. Army).

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

The translational research team will work with the well-established GAP clinic to increase the enrollment of older adults into research studies that may include pharmaceutical clinical trials and collaborate with the basic and public health scientists.

The research team will focus on early detection of Alzheimer's, estrogen's role in Alzheimer's and Parkinson's, stroke therapy and identification of oxidation processes to measure brain aging.

We will increase the amount of research we conduct from the bench to the bedside. Currently, we have several drugs in clinical trials for the treatment of Alzheimer's disease, Parkinson's disease and stroke. Furthermore, we are partners with private-sector biotechnology and pharmaceutical companies in the development of treatments for neurological disorders. We will also participate in pharmaceutical clinical trials with faculty from the new UNT System College of Pharmacy.

In addition, we will continue to work closely with the local Alzheimer's Association, the Texas Council on Alzheimer's Disease and Related Disorders and support educational and health promotion programs that encourage healthy brain aging in our community.

(4) Funding Source Prior to Receiving Special Item Funding:

The Alzheimer's Diagnostic and Treatment Center was not funded prior to receiving special item funding for FY 2002 & 2003.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

The Alzheimer's Diagnostic and Treatment Center has been funded from appropriated General Revenue since FY 2002 & 2003.

(7) Consequences of Not Funding:

The research team in our Institute for Aging and Alzheimer's Disease Research (IAADR) has focused on early detection of Alzheimer's, estrogen's role in Alzheimer's and Parkinson's, stroke therapy and identification of oxidation processes to measure brain aging. Currently, the IAADR is leading the development of preclinical trials in Aging and Alzheimer's Disease.

Without ongoing funding, the UNT Health Science Center would not be able to support the programs initiatives.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 2 **DNA Laboratory**

(1) Year Special Item: 2000
Original Appropriations: \$217,428

(2) Mission of Special Item:

The primary applications of DNA technology at the UNT Health Science Center include paternity testing, forensic assessment, diagnosis of Lyme Disease, and identification of missing persons. Additionally, faculty specializing in gene regulations and genetic polymorphisms are involved in basic research understanding how genes influence pathology and to develop new gene therapies. A professional master's degree in biomedical sciences with a specialization in Forensic Genetics has been established and has become the primary source of new DNA forensic analysts for crime laboratories within Texas.

The DNA/Identity Laboratory was first funded in 1989 to support the Texas Attorney General's Child Support Division in paternity testing. Additional funding was appropriated by the 77th Texas Legislature to establish the Lyme Disease laboratory and expand clinical genetics education. Through the Office of the Attorney General, the 77th Texas Legislature also funded the creation of a Missing Persons Database, connected to the FBI's CODIS database (Combined DNA Index system), which was operational in January 2003. The Texas Missing Person's Database requires direct state funding to support the needs of Texans.

The UNTHSC DNA Laboratory is a rich essential resource for Texans, providing genetic assessment services in paternity, Lyme Disease and forensic applications including missing persons. A doctoral degree program has been implemented with a discipline in Forensic Genetics.

(3) (a) Major Accomplishments to Date:

The UNT Center for Human Identification's (UNTCHI) Missing Person's DNA database is primarily housed at the UNTHSC at Fort Worth, along with analysis performed at the Lab of Forensic Anthropology at the UNT, Denton Campus. UNTCHI works in collaboration with the Department of Public Safety's Missing Persons Clearinghouse in Austin, Texas and, since its inception in 2003, we have been responsible for more than 1,300 identifications throughout the State of Texas and the entire U.S. In 2013, we have made 283 associations leading to the identification of the skeletal remains of the individual, many of whom were murder victims. UNTCHI is currently the single largest contributor of DNA profiles to the CODIS indexes dealing with missing and unidentified remains. Moreover, the UNTCHI has testified in dozens of cases within Texas and does not charge the courts any money for testimony.

In 2013, the Forensic division of the UNTCHI provided DNA testing for hundreds of police agencies in 55 counties throughout Texas. All of the funding to process these cases came from money provided from the National Institute of Justice in conjunction with the Texas Department of Public Safety.

The Texas Department of State Health Services (DSHS) Zoonosis Control Program has partnered with the UNTHSC Tick-Borne Disease Research Laboratory for the analysis of ticks that have been attached to humans for pathogenic disease agents.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

763 University of North Texas Health Science Center at Fort Worth

We fully anticipate the UNTCHI will continue to identify a significant number of unidentified human decedents that are found throughout Texas and especially along the border counties that are located within the over 1,900 miles that are adjacent to the Texas-Mexican Borders. Many of these identifications will be the result of a violent crime and, in a number of these cases, the identification of the remains will lead to the apprehension and conviction of the true perpetrator of the murder.

We continue to receive Federal Backlog funds from the National Institute of Justice through the Texas DPS to provide DNA testing for a large number of law enforcement agencies throughout the DFW Metroplex and the State of Texas. This testing will result in a significant number of CODIS hits that will result in convictions of the perpetrators.

With the thousands of children that are crossing the border to get into the U.S. daily, DNA testing and the establishment of databases will be used to track these children and serve as a possible deterrent to prevent them from continuing their attempts to cross the border.

(4) Funding Source Prior to Receiving Special Item Funding:

The DNA/Identity Laboratory was not funded prior to receiving special item funding for FY's 2000 & 2001.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

The DNA/Identity Laboratory has been funded from appropriated General Revenue since FY's 2000 & 2001. The UNT Center for Human Identification currently receives support from both the National Institute of Justice and the Texas Legislature, through the Department of Public Safety, to supply both the DNA and anthropological analysis of human skeletal remains, as well as to families with a missing loved one. Currently the State does not provide any legislative support for the forensic casework that UNTCHI provides to law enforcement agencies and prosecutorial agencies performed within Texas; rather, funding is provided from Federal Backlog grants.

(7) Consequences of Not Funding:

The State Legislature established the Texas Missing Persons DNA Database in 2001 on the UNTHSC campus with funding provided by the Attorney General's Crime Victims' Compensation Fund. The database began accepting samples from Texas law enforcement agencies in March 2003.

Texas was the first state in the country with a Missing Persons DNA Database capable of analyzing both Mitochondrial and STR systems and is the first state to participate in the federal database for missing persons (The FBI's Combined DNA Index System or CODIS). The database provides a very powerful tool for investigators trying to locate missing persons or identify remains by allowing federal, state, and local crime laboratories to electronically exchange and compare DNA profiles. The DNA analysis provided by the Texas Missing Persons DNA Database is at no charge to law enforcement agencies or families with missing members. The UNT Center for Human Identification Laboratory has provided scientific and technical support for Texas law enforcement agencies and crime labs for more than 10 years. UNTHSC's nationally and internationally renowned faculty and DNA Analysts serve as experts for the Attorney General's Office and District Attorney's offices throughout the State.

Without ongoing funding, the UNTHSC would not be able to support the initiatives described above.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 3 **ECONOMIC DEVELOPMENT & TECHNOLOGY COMMERCIALIZATION**

(1) Year Special Item: 2006
Original Appropriations: \$1,550,000

(2) Mission of Special Item:

The mission of Economic Development and Commercialization is to facilitate the development of Biotechnology and Translational Research at UNT Health Science Center. The special item contributes to accomplishing the goals set forth in Texas' Biotechnology Roadmap. This funding supports continued progress in taking biomedical research from the bench to the bedside and the community, as well as the translation of new biotechnology discoveries into patents, commercial licenses, startup companies and jobs.

(3) (a) Major Accomplishments to Date:

Alliances and Partnerships that add value to Research at UNTHSC include:

The UNTHSC/Tech Fort Worth Community Partnership
SBIR and STTR Partners
Industrial Sponsored Research Programs
BioDFW
Texas Healthcare and Bioscience Institute
Health Industry Council
Fort Worth Life Science Coalition
UNTHSC Executives-In-Residence Program

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Increase in the number of collaborative efforts and partnerships between the City of Fort Worth and UNTHSC, which will lead to increases in the development of Intellectual Property at UNTHSC and the expansion of the UNTHSC Executive-in-Residence Program.

(4) Funding Source Prior to Receiving Special Item Funding:

The Economic Development and Tech Commercialization did not receive funding until 2006.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

NA- Funding for this special item is revenue neutral per Article III-191 rider 6.

763 University of North Texas Health Science Center at Fort Worth

(7) Consequences of Not Funding:

Consequences of not funding this special item would result in eliminating initiatives between the City of Forth, UNT Health Science Center and Tech Fort Worth.

763 University of North Texas Health Science Center at Fort Worth

Special Item: 4 **INSTITUTIONAL ENHANCEMENT**

(1) Year Special Item: 2000
Original Appropriations: \$1,000,000

(2) Mission of Special Item:

Institutional Enhancement funds are used for salary support throughout the UNT Health Science Center to help support the growth in medical education, research, and public health.

(3) (a) Major Accomplishments to Date:

Core institutional functions have been preserved with these funds.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continue to help preserve core institutional functions.

(4) Funding Source Prior to Receiving Special Item Funding:

Institutional Enhancement was not funded prior to receiving special item funding in FY 2002.

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

Institutional Enhancement has been funding from appropriated General Revenue since FY 2002.

(7) Consequences of Not Funding:

Because General Revenue plays a significant role in financing the core operations of our institution, it is important that it be maintained and not reduced. The consequences of not funding Institutional Enhancement would result in the loss of key faculty positions in our medical school, graduate school of biomedical sciences, and school of public health.
