

THANK YOU FOR HELPING THE

UNT HEALTH SCIENCE CENTER COMMUNITY GARDEN

CREATE A HEALTHIER COMMUNITY!

Your generous donation has turned an unused 1/4-acre in Fort Worth's West 7th Corridor into fertile ground for sustainable food, learning, and philanthropy.

From the Ground Up: We built the garden on Feb. 15, 2014 with over 40 volunteers using funds from the Sustainability Committee and more than \$5,700 in cash and in-kind donations from our donors including:

- Archie's Gardenland
- Harvest Supply
- Calloway's Nursery
- Silver Creek Materials
- Freehling Tree Service, LLC
- St. Emilion Restaurant
- Texas AgriLife Extension Tarrant County
- UNT Health Science Center Facilities Management Dept.

How Your Support has Impacted Your Community:

More than 60 pounds (200 servings) of fresh organic produce donated to Northside Intercommunity Agency food pantry.

Fresh, edible prizes given at three sustainability events on UNTHSC's campus.

250 people – mostly school children have taken educational tours of the garden.

Novice gardeners are learning to garden organically.

Positive Feedback from the Community:

"This is great! I want to help."

"I walk over to see your progress."

"How can I contribute?"
