techtransfer@unthsc.edu
or 817-735-5147

Application

- Useful for structural studies and characterization of the cholesterol transport process.

Research Tool
2007-105

Our Inventors
Dr. Andras Lacko
andras.lacko@unthsc.edu

Dr. Walter McConathy

Publications
"Characterization of lecithin:cholesterol acyltransferase expressed in a human lung cell line."

Details

- Goat anti-human recombinant lecithin-cholesterol acyltransferase (LCAT)
- Usable in Western blotting at 1:250
- Monospecificity by absence of bands by immunoblotting of whole plasma on 3-15% SDS PAGE but positive band with isolated plasma LCAT and recombinant LCAT
