

Process for Determining When to Call Together the IACUC “Dream Team”

PI submits new protocol or amendment to IACUC for review

IACUC Administrator completes pre-review of new protocol/amendment
(works with PI if any initial changes to submission are needed)

BASED ON PRE-REVIEW, CAN TYPE OF REVIEW BE DETERMINED?

Questions for IACUC Administrator to Consider:

- ✓ Does new protocol/amendment request make sense as submitted?
- ✓ Do we know if any hazards are occurring?
- ✓ Is correct anesthetic and/or analgesic being used?
- ✓ If amendment, is a justification for the amendment request included in the submission, and if so, does it make sense?
- ✓ Does Safety need to review the amendment request?

If No...

...Call for the IACUC “Dream Team”!!!

IACUC Administrator will contact IACUC Chair, Attending Veterinarian, and Safety/Biosafety Officer (if needed) and set-up a meeting to discuss new protocol/amendment, prior to sending any comments/feedback to the investigator.

**Note: If, at any point during the review process, the appropriate information has not been received to proceed with (or approve) the new protocol/amendment, a meeting which includes the PI/study team member (in addition to IACUC Dream Team) may need to be held.*

If YES:

IACUC Administrator sends new protocol/amendment through appropriate review channel:

- Administrative Review
- Veterinary Verification & Consultation
- Designated Member Review
- Full Committee Review
