

Healthy Volunteers Needed!

Researchers at the University of North Texas Health Science Center at Fort Worth, Texas College of Osteopathic Medicine (TCOM), in the Department of Family Medicine, need your help in testing the safety of a new vibration device designed to increase neuromuscular function.

You may be eligible to participate!

You are eligible to participate if you have:

- No numbness or tingling of arms or legs at the time of testing
- No history of stroke, muscular dystrophy, or cerebral palsy
- No history of traumatic brain injury
- No history of multiple sclerosis
- No history of tears in the upper arm or upper leg muscles

The study will involve measuring muscle activity and force testing, before and after testing with the vibration device. The device will be tested on each of your upper arms and upper legs. The entire visit will take no more than four hours.
