### **PERSONAL STATEMENT**

I am broadly trained as a spatial epidemiologist. My research efforts have focused on spatial epidemiology in different transmission settings. My most important research accomplishments relate to my innovative use of Geographic Information System (GIS) to assess the risk factors. My basic understanding of spatial epidemiology and my considerable collaborative efforts with colleagues across the globe have allowed me to adapt diverse spatial tools to pursue questions of the spatial drive of epidemiology to emerging and reemerging infectious diseases. I am also contributing to landslides and human health.
