PURPOSE OF THE GENERAL CLERKSHIP
The clinical clerkships affiliated with the Texas College of Osteopathic Medicine serve to provide supervised, high quality opportunities for third and fourth year medical students to apply and transform the declarative medical knowledge and basic clinical skills that they have acquired into procedural clinical competence, while also functioning as learning members of health care teams.

The clinical clerkships promote and support TCOM students in developing clinical competence with emphasis on the core competencies beyond medical knowledge alone. Clerkships are encouraged to seek opportunities for students to provide Health and Wellness Counseling, develop improved interpersonal and communication skills, professionalism, as well as practice-based learning and improvement.

CLERKSHIP DESCRIPTION
The faculty and staff from the Department of Internal Medicine are pleased to have you join us for your core rotation in Internal Medicine. Our goal is to provide clinical encounters and learning experiences that offer you the opportunity to acquire an appropriate database and skills training in the specialty of Internal Medicine. We know that you will be challenged and stimulated during your eight-week rotation. The faculty is committed to guiding you in the development of a clearer understanding of the pathophysiology. No matter what specialty you ultimately enter upon graduation from medical school, the experiences you have and the skills you develop during this clerkship will form a foundation for your life as a physician.
CLERKSHIP COMPETENCIES

The objectives of the Clinical Clerkships are to enable TCOM students to achieve competence as graduate osteopathic medical students. As such, the objectives of the clerkship curriculum are represented by the AACOM Osteopathic Core Competencies for Medical Students. For the purposes of the TCOM Clinical Clerkship Competencies, the AACOM 14 Competencies have been condensed into the following 8:

1. Osteopathic Principles and Practices
2. Medical Knowledge
3. Patient Care
4. Interpersonal and Communication Skills
5. Professionalism
6. Practice-Based Learning and Improvement
7. Systems-Based Practice
8. Health Promotion/Disease Prevention

GENERAL COMPETENCIES

• Osteopathic Principles and Practices
  ▪ Demonstrate an awareness of the basic tenets of osteopathic philosophy and ability in basic manipulative medicine.
  ▪ Understand the interdependence of the musculoskeletal/lymphatic system and other organ systems.
  ▪ Understand that the mind, body and spirit all interact in the promotion of health and wellbeing.
  ▪ Demonstrate the ability to utilize osteopathic manipulative medicine as a part of their patient care regimen.

• Patient Care
  ▪ Caring and respectful behaviors
  ▪ Interviewing
  ▪ Informed decision-making
  ▪ Develop and carry out patient management plans
  ▪ Counsel and educate patients and families
  ▪ Performance of procedures
    ▪ Routine physical exam
    ▪ Medical procedures
  ▪ Preventive health services
  ▪ Work within a team
  ▪ Provide osteopathic knowledge, principles and practices into patient care.

• Medical Knowledge
  ▪ Investigatory and analytic thinking
  ▪ Knowledge and application of basic science
  ▪ Must be able to demonstrate the understanding and application of the principles of osteopathic medicine involving clinical, social and behavior sciences.
• Practice-based Learning and Improvement
  ▪ Analyze own practice for needed improvements
  ▪ Use of evidence from scientific studies
  ▪ Application of research and statistical methods
  ▪ Use of information technology
  ▪ Facilitate learning of others
  ▪ Demonstrate ability to integrate evidence based medicine into osteopathic clinical practice.

• Interpersonal and Communication Skills
  ▪ Creation of therapeutic relationship with patients
  ▪ Listening skills
  ▪ Demonstrate interpersonal and communication skills to provide professional relationships related to osteopathic principles and practices.

• Professionalism
  ▪ Respectful, altruistic
  ▪ Ethically sound practice
  ▪ Sensitive to cultural, age, gender, disability issues
  ▪ Demonstrate an understanding that he or she is a reflection of the osteopathic profession.

• Systems-based Practice
  ▪ Understand interaction of their practices within the larger system
  ▪ Knowledge of practice and delivery systems
  ▪ Practice cost effective care
  ▪ Advocate for patients within the health care system

INTERPROFESSIONAL EDUCATION COURSE COMPETENCIES

Competency Domain 1: Values/Ethics for Interprofessional Service

Competency Domain 2: Roles/Responsibilities

Competency Domain 3: Interprofessional Communication

Competency Domain 4: Teams and Teamwork
Clerkship Goals and Learning Objectives

At the end of the eight-week rotation, the student will be able to:

1. Describe the characteristic, historic, physical, and biopsychosocial features of the following commonly seen in Internal Medicine.
   - Acute Coronary Syndrome
   - Urinary Tract Infection
   - Delirium/Dementia
   - Meningitis
   - Esophageal disease
   - Headache
   - Sepsis/Septic shock
   - Acute Renal Failure
   - Tuberculosis
   - Alcoholism
   - Depression
   - Osteoporosis
   - Congestive Heart Failure
   - Valvular Heart Disease
   - Hypertension
   - Hyperlipidemia
   - Pneumonia
   - COPD
   - Asthma
   - Chronic Liver Disease
   - GI bleed
   - Diabetes
   - HIV/AIDS
   - Thyroid Disease
   - Anemia
   - Stroke
   - Breast Cancer/Lung Cancer/Colon Cancer

2. Formulate a prioritized list of the 8-10 most common differential diagnoses for each of the problems/diseases specified by combining clinical information and outside resources effectively (literature search, readings, etc.).

3. Formulate a cost effective diagnostic approach consistent with the prioritized differential diagnoses.

4. Define therapies for common disease processes encountered in Internal Medicine.

5. List common risks vs. benefits to be considered when selecting treatments and management therapies.

6. Perform a thorough history and physical exam.

7. Present cases concisely, emphasizing the pertinent elements of the historical and physical findings, labs, treatments, and the biopsychosocial explanations for each problem.

8. Recognize urgent/emergent situations and alert appropriate health care providers.

9. Demonstrate professionalism, compassion, and empathy when communicating with patients and healthcare team members.

10. Demonstrate effective communication in the patient’s chart by creating a comprehensive and pertinent legal document.

11. Demonstrate a desire to learn by asking questions of faculty, fellow students, and team members.

12. Exhibit a capable and professional demeanor by concern for patients and in interactions with team members.

13. Complete the required curriculum (lectures, Qbank, etc.).

14. Observe at least 2 of each of the following Internal Medicine procedures.
   - Central Line
   - Paracentesis
   - Thoracentesis
   - Lumbar Puncture
   - Arterial Line
   - Intubation
   - ACLS Protocol
   - Nasogastric Tube Insertion
CLERKSHIP REQUIRED DIDACTICS AND STUDY ASSIGNMENT

SIMPLE (Simulated Internal Medicine Patient Learning Experience)

SIMPLE is MedU's virtual patient program for the internal medicine clerkship. SIMPLE’s 36 interactive virtual patient cases are designed to encompass the clerkship learning objectives, accessible through the following webpage: www.med-u.org.

Each student is expected to complete all 36 cases and self-assessments with a passing grade prior to the last day of the rotation to receive credit. You only have to take each assessment once and get a passing grade. If you fail the assessment, you must retake it until a passing grade has been achieved. You are only permitted to have 5 cases in yellow. All others must be green. Red cases will be reset for retake. Please note you can take these assessments multiple times.

The student’s level of participation will factor into his/her Clerkship evaluation grade, as detailed in section 6 of the Internal Medicine Clerkship syllabus. The clerkship director will be monitoring the student’s progress on Med-U on a weekly basis.

*** Failure to complete the requisite 36 cases in a timely manner will result in failure and remediation of the Internal Medicine Clerkship. SIMPLE clinical cases will comprise 25% of overall grade.

***See page 22 for FAQs and registration information

Educational Conferences-Attendance Required

Plaza Medical Center (All activities take place in Plaza Professional Building, Education Suite 220)
Attendance – 100% required at the following times:
1. Monday, Tuesday and Friday @ 7:15 a.m. – Morning Report
2. Wednesday, Critical Thinking Symposium @ 7:15 AM
3. Journal Club 1st Monday Monthly @ Noon
4. Grand Rounds 3rd Monday Monthly @ Noon
5. Thursday @ 7:30 a.m. and Monday at Noon – EKG Lecture
6. Every other Tuesday rotates from Ambulatory Care / Harrisons
7. Every other Wednesday – Tumor Conference @ Noon
8. Monthly M&M @ Noon

Methodist Medical Center-Dallas: all medical students are responsible for timely attendance of all conferences, unless your team is admitting or transferring a sick patient to the ICU. These conferences are considered a part of your education and you must attend in order to pass.
A. Morning report:
   1. July 1-June 30—Mondays, Tuesdays, and Wednesdays 1200-1230 in Med Ed Conference Room
   2. July 1-June 30—Thursdays 1200-1230 with Chief Residents in Med Ed Conference Room
B. Noon conferences:
   1. See schedule for topics, locations and times.
   2. Lunch is usually provided--if you are late, attend the conference and eat afterwards.
   3. Attendance will be taken and reported to your school and in your evaluation.
C. Grand Rounds:
   1. September through May
   2. Thursdays 12:00-1:00 in Weiss Auditorium

John Peter Smith Hospital:
• Family Practice conference room, 12:00-1:00pm, lunch typically provided
CORE ENTRUSTABLE PROFESSIONAL ACTIVITIES (EPAS) FOR ENTERING RESIDENCY

These are the skills and behaviors expected of first year residents on day one of their residencies, as described by the ACGME residency directors and described in detail in the AAMC document of the above name. It is hoped that clinical clerkship directors and facilitators will make as much effort as possible to ensure that TCOM students have opportunities to practice these skills and behaviors on all clinical rotations.

1. Gather a history and perform a physical examination.
2. Prioritize a differential diagnosis following a clinical encounter.
3. Recommend and interpret common diagnostic and screening tests.
4. Enter and discuss orders and prescriptions.
6. Provide an oral presentation of a clinical encounter.
7. Form clinical questions and retrieve evidence to advance patient care.
8. Give or receive a patient handover to transition care responsibility.
9. Collaborate as a member of an Interprofessional team.
10. Recognize a patient requiring urgent or emergent care and initiate evaluation and management.
11. Obtain informed consent for tests and/or procedures.
13. Identify system failures and contribute to a culture of safety and improvement.
EVALUATION AND GRADING

Faculty will provide feedback directed to strengths and content knowledge or skills requiring improvement. A brief formal assessment will be done after two weeks (see enclosed example) for any student in jeopardy of failing. Supervising faculty will assess each student, completing the clinical clerkship evaluation form via new innovations at the end of each four-week rotation. The faculty assessment portion of the overall score will be based on these clinical clerkship evaluations. It is our goal that all students will receive verbal feedback in an individual meeting with the faculty on service to fully discuss the assessment and receive feedback from the student.

**Fort Worth Based Students Grades will be calculated as follows:**

<table>
<thead>
<tr>
<th>Faculty Assessment</th>
<th>25%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Month 1</td>
<td>25%</td>
</tr>
<tr>
<td>Month 2</td>
<td>25%</td>
</tr>
<tr>
<td>NBOME COMAT Exam</td>
<td>25%</td>
</tr>
<tr>
<td>SIMPLE Clinical Cases Grade</td>
<td>25%</td>
</tr>
<tr>
<td>Overall Score</td>
<td>100%</td>
</tr>
</tbody>
</table>

**Offsite Students Grades will be calculated as follows:**

<table>
<thead>
<tr>
<th>Faculty Assessment</th>
<th>25%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Month 1</td>
<td>25%</td>
</tr>
<tr>
<td>Month 2</td>
<td>25%</td>
</tr>
<tr>
<td>NBOME COMAT Exam</td>
<td>25%</td>
</tr>
<tr>
<td>SIMPLE Clinical Cases Grade</td>
<td>25%</td>
</tr>
<tr>
<td>Overall Score</td>
<td>100%</td>
</tr>
</tbody>
</table>

Clinical Performance is assessed by each attending with whom the student has contact. A composite score is derived for this element of your grade. Professionalism and work habits are a significant portion of the clinical assessment. These include the student attitude, demeanor, and interaction with attendings, peers, and staff. Character qualities and behaviors such as punctuality, teachability, honesty, bedside manner, and integrity are important for your professional development.

Please note, at the discretion of the clerkship director, points may be deducted from the final grade or may result in failure of rotation for non-professional student conduct, i.e. issues with attitude, absenteeism, participation.

According to the Uniform Policies and Procedures, “failure of a subject exam results in a grade of incomplete in the rotation, and failure of the second shelf exam in the same rotation results in the failure of the rotation.” In order to pass the Internal Medicine clinical clerkship, a student must pass the COMAT exam **and** receive an overall score of 70 or higher. Failure of either of these will result in failure of the Internal Medicine clinical clerkship. Students who fail the clinical clerkship will be required to appear before the Student Performance Committee (SPC). If any remediation is required the highest overall score a student will be able to achieve for the clinical clerkship is a 70. This is in line with TCOM’s remediation policy.

The NBOME COMAT exam is administered on the last Friday of the two-month rotation, time and location to be announced. Students should arrive approximately 30 minutes early for registration, seating and instructions. If a student is unable to take the examination at the scheduled time, it is the student’s responsibility to make other arrangements, in advance, through the Testing and Evaluation Services at 817-735-2693.

As required by UNTHSC and outlined in the student handbook, all students participating in the core internal medicine rotation must complete the NBOME exam. A score of 70 is required to pass the COMAT exam. As indicated above, and according to the Uniform Policies and Procedures, “failure of a subject exam results in a grade of incomplete in the rotation, and failure of the second shelf exam in the same rotation results in the failure of the rotation.”
ROTATION SITES

Team 1 - Ward Service: John Peter Smith Hospital, Fort Worth
This is an inpatient general medicine service in a busy county hospital setting. Students work under the supervision of internal medicine faculty, residents and interns. Team assignments are made by the Department of Internal Medicine at JPSH. Students should report to JPS Physician Services for badges and sign-in per instructions sent via email by JPSH.

1500 S. Main Street
Fort Worth, TX  76104
(817)-927-1200

Team 2 – Ward Service: Plaza Medical Center
This is an inpatient service in a hospital setting. Students work under the supervision of adjunct clinical faculty, residents and intern. Students should report to the Plaza Professional Building, Education Suite 220 at 9:00am on the first day of rotation.

900 8th Avenue
Fort Worth, TX 76104
(817) 877-5292

Team 3 – Ward Service: Methodist Medical Center-Dallas
This is an inpatient service in a hospital setting. Students work under the supervision of Methodist Medical Center faculty, physicians, residents and intern. Students should report to the Medical Student Coordinator in the Medical Education Office at Methodist Medical Center at 9:00am on the first day of rotation.

1441 N. Beckley Avenue
Dallas, TX 75203
(214) 250-2000

GENERAL RESPONSIBILITIES

Clinical problems encountered during daily clinical activities with the faculty will direct a significant portion of your educational experience. Students will set learning goals based on knowledge deficits identified during patient interactions, pursuing the literature during free time to fill in the expected gaps in knowledge.

However, patient problems and diseases encountered are unpredictable. In order to ensure that students are directed to disease and clinical scenarios of importance in the discipline of internal medicine, the content outline defines patient problems of relevance to a third or fourth year student. A list of references is provided and it is the student’s responsibility to address each of these topics during self-study. The topics will be discussed as requested and preparation will facilitate an informed discussion. These daily interactions with the faculty will not be lecture-based, but learner-centered, the needs of the student directing the interaction.

As with most clinical services, students will be responsible for the initial evaluation of patients on the hospital service by performing a careful interview and physical examination, reviewing pertinent laboratory and radiological studies, and formulating a preliminary diagnosis and plan for further diagnostic study and therapeutic intervention. In the ambulatory clinic, nursing facility visits or home visits (where most patients receive follow-up care), a more abbreviated, focused approach is appropriate, the depth of interview and examination directed by the attending physician prior to patient contact. The case will then be presented in concise fashion to the attending physician, relaying pertinent parameters, diagnostic assessment, differential diagnostic possibilities and pathophysiologic justification for the diagnosis and proposed course of action. Discussion will follow, with clarification and reinforcement of important conceptual knowledge. This should allow the student to identify areas requiring further study to enhance understanding of the problems or diseases under consideration.

It is expected that there will be significant gaps in the knowledge base of third and fourth year medical students with limited clinical experience in the specialty of internal medicine. The purpose of probing questions by the attending faculty is not to embarrass or intimidate the learner but to identify prior knowledge and direct the student to important areas of misunderstanding or new data that should be acquired to enhance the learner’s conceptual knowledge of internal medicine.

After patient assessment and discussion, it is the responsibility of the student to carefully document their findings and impressions in the progress notes in a problem-oriented fashion. An initial assessment requires an in-depth progress note. Additionally, students are expected to write daily progress notes prior to rounds, which will usually be in the late morning or early afternoon, to allow sufficient time for clinical clerks and house-staff to perform work rounds and patient evaluation prior to teaching rounds with the attending physician. All written notes will be reviewed and cosigned by the on-service faculty.

Student feedback will be provided frequently, striving to help the student learn as much as possible during the rotation. Any concerns, difficulties or problems should be discussed with the attending or the course director to find solutions that enhance the quality of the student’s learning and enjoyment of what the faculty hopes is an enjoyable as well as challenging experience.
GENERAL GUIDELINES

Attendance Policy
The Department of Internal Medicine expects 100% attendance at all required clinics, rounds, meetings and assigned functions. Students are required to strictly adhere to the attendance policies described in “Uniform Policies and Procedures for Clinical Clerkships”. Failure to do so may result in disciplinary action.

ATTENDANCE (per the “Uniform Policies and Procedures for Clinical Clerkships”)

The focus of the clinical experience in years 3 and 4 is patient care. 100% attendance is, therefore, required to be certain that continuity of care is maintained. It is understood; however, that certain situations may arise that will result in absence from required daily participation.

In such instances the following policies will be observed:

All absences are subject to approval by the clerkship director. Even if the absence is approved, the clerkship director or preceptor may require an additional assignment or for time to be made up from any student who misses time on their service. Make up days should be completed within the regularly scheduled rotation.

All absences shall require submission of a Request for Absence from Clerkship form. That form is available either on-line or in the Office of Clinical Education.

Unapproved absence or absence in excess of the above policy may require remediation or result in a lower grade at the discretion of the clerkship director.

Absence of 5 days or more during any 4 week rotation (or any 4 weeks of an 8 week rotation) or absence of 7 days for 6-week rotations will result in a grade of INCOMPLETE and repeat of the entire rotation will be required.

Failure to notify the clerkship director or rotation supervisor of any absence will be considered neglect of duty and may result in a failing grade for the clerkship.

Students may be granted approval for absence by the Associate Dean for Medical Education for participation in select Health Science Center activities. Such approval must be obtained in advance with written notification to the clerkship director. Please review the individual syllabi for additional attendance requirements.

If you are ill, or otherwise cannot be in the clinic, you must notify your clinic director at the earliest possible time. Do not call the department answering service and leave a message.
**Professionalism and Ethics**
We expect you to give the appearance and behavior of an advanced medical student about to become a physician. You should remember that medical ethics of confidentiality should be adhered to. Appropriate identification identifying you as student physicians should be worn at all times when seeing patients. The student physician should appear well groomed, neatly dressed, and give a good professional image. Dress requirements include a cleaned and pressed clinic jacket. We reserve the right to suggest that dress may not be suitable, or we may suggest appropriate attire. Your response will be judged as part of your self-management.

We expect you to maintain the highest standard of professionalism and ethical behavior at all times. This includes your relationship with the clinic staff, and your fellow students.

**Problem Patients**
If you are having trouble with a patient, please notify your supervising physician. He/she will advise you or get further consultation on how to handle the situation.

**Availability**
You must be readily available at all times during clinic hours. If for any reason you must leave the clinic, you must notify both the supervising faculty and the head nurse. Your home phone number must be listed with your assigned clinic office.

**Equipment**
Carry your stethoscope with you during clinic hours.

**Courtesy Visits**
Under no circumstances are you to see a patient unless they have signed in with the receptionist of your clinic. Do not see your classmates or fellow students informally. They must register with the front desk. Under no circumstances are you to discount any charges without the approval of the supervising faculty.
DISCLAIMER

The clinical clerkship is operated in accordance with the policies and procedures of the academic programs of the Texas College of Osteopathic Medicine as presented in your class’ Clerkship Manual, Student Handbook and College Catalog.

The Texas College of Osteopathic Medicine shall not discriminate on the basis of race, ethnicity, color, sex, sexual orientation, gender, gender identity, religion, national origin, age or disabilities.

Academic Integrity/Honor Code
Enrollment is considered implicit acceptance of the rules, regulations, and guidelines governing student behavior at UNT Health Science Center. It the responsibility of the student to be familiar with all policies governing academic conduct which can be found in the UNTHSC Student Catalog, Student Policy Handbook and the Student Code of Conduct and Discipline which are located on the UNTHSC Internet at http://www.hsc.unt.edu/Sites/DivisionofStudentAffairs/

Academic Assistance
Students may schedule one-on-one academic assistance with faculty through in-person appointments, telephone calls or e-mail communication. Academic assistance is also available through the UNTHSC Center for Academic Performance (CAP). http://www.hsc.unt.edu/CAP

Attendance and Drop Procedure
Course instructors and the School’s administration expect students to attend class. It is the responsibility of the student to consult with the instructor prior to an absence, if possible. Withdrawal from a course is a formal procedure that must be initiated by the student. Students who stop attending class and do not withdraw will receive a failing grade. Students should consult with the instructors prior to withdrawing. In some cases a perceived problem may be resolved, allowing the student to continue in the course. It is the student’s responsibility to be familiar with the policies and procedures as stated in the Student Handbook and the UNTHSC Catalog located on the UNTHSC Internet at http://www.hsc.unt.edu/departments/studentaffairs/.

Americans with Disabilities Act
The University of North Texas Health Science Center does not discriminate on the basis of an individual’s disability and complies with Section 504 and Public Law 101-336 (American with Disabilities Act) in its admissions, accessibility, treatment and employment of individuals in its programs and activities. UNTHSC provides academic adjustments and auxiliary aids to individuals with disabilities, as defined under the law, who are otherwise qualified to meet the institution's academic and employment requirements. For assistance contact the Assistant Director, Disability Accommodations within the Center for Academic Performance at the Health Science Center. Reference Policy 7.105 Americans with Disabilities Act Protocol in the Student Policies.
Course and Instructor Evaluation
It is a requirement of all students that they are responsible for evaluating each of their courses and instructors as defined in UNTHSC Policy 7.120 Student Evaluation of Courses and Instruction. Please adhere to all guidelines established in the policy.

Course Assessment In some instances, courses will have a course assessment that will provide immediate feedback to the course director regarding progress of the course identifying potential problems and determining if student learning objectives are being achieved. (Provide all pertinent information regarding the specifics of the groups in the syllabus as defined in UNTHSC Policy 7.120 Student Evaluation of Courses and Instruction.)

Syllabus Revision
The syllabus is a guide for this class but is subject to change. Students will be informed of any change content or exam/assignment dates.

Turnitin and the Family Education Rights and Privacy Act (FERPA) – If applicable
NOTE: UNTHSC has contracted with Turnitin.com for plagiarism detection services. Use of Turnitin.com is entirely in the discretion of the instructor, but use of such a service requires that you provide notice (via syllabus) to your students that you are using such services. In addition, instructors who use Turnitin should be sure to remove student identifiable information from the work before sending to Turnitin or receive written permission from the student. There are two methods for using Turnitin for written assignments. Please refer to the wording guidelines and consent form located on the Faculty Affairs website at http://www.hsc.unt.edu/Sites/OfficeofFacultyAffairs/index.cfm?pageName=Turnitin.

Zero Tolerance for Sexual Violence and Harassment
All students should be able to study in an atmosphere free of harassment, sexual violence and gender discrimination. Title IX makes it clear that violence and harassment based on sex and gender is a Civil Rights offense subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories such as race, national origin, etc. If you or someone you know has been harassed or assaulted, you can find the appropriate resources on the UNT Health Science Center’s website: http://web.unthsc.edu/info/200304/student_affairs/355/title_ix_reporting

We reserve the right to make clinical assignments based on needs and availability.
APPENDICES

General Teaching Strategies

Clinical problems encountered during daily clinical activities with the faculty will direct a significant portion of your educational experience. Students will set learning goals based on knowledge deficits identified during patient interactions, pursuing the literature during free time to fill in the expected gaps in knowledge.

However, patient problems and diseases encountered are unpredictable. In order to ensure that students are directed to disease and clinical scenarios of importance in the discipline of internal medicine, the content outline defines patient problems of relevance to a third or fourth year student. A list of references is provided and it is the student’s responsibility to address each of these topics during self-study. The topics will be discussed as requested and preparation will facilitate an informed discussion. These daily interactions with the faculty will not be lecture-based, but learner-centered, the needs of the student directing the interaction.

As with most clinical services, students will be responsible for the initial evaluation of patients on the service by performing a careful interview and physical examination, reviewing pertinent laboratory and radiological studies, and formulating a preliminary diagnosis and plan for further diagnostic study and therapeutic intervention. In the ambulatory clinic, nursing facility visits or home visits (where most patients receive follow-up care), a more abbreviated, focused approach is appropriate, the depth of interview and examination directed by the attending physician prior to patient contact. The case will then be presented in concise fashion to the attending physician, relaying pertinent parameters, diagnostic assessment, differential diagnostic possibilities and pathophysiologic justification for the diagnosis and proposed course of action. Discussion will follow, with clarification and reinforcement of important conceptual knowledge. This should allow the student to identify areas requiring further study to enhance understanding of the problems or diseases under consideration.

It is expected that there will be significant gaps in the knowledge base of third and fourth year medical students with limited clinical experience in the specialty. The purpose of probing questions by the attending faculty is not to embarrass or intimidate the learner but to identify prior knowledge and direct the student to important areas of misunderstanding or new data that should be acquired to enhance the learner’s conceptual knowledge.

After patient assessment and discussion, it is the responsibility of the student to carefully document their findings and impressions in the progress notes in a problem-oriented fashion. This activity will be rotation-specific, and instructions will be given by the attending faculty.

Student feedback will be provided frequently, striving to help the student learn as much as possible during the rotation. Any concerns, difficulties or problems should be discussed with the attending or the course director to find solutions that enhance the quality of the student’s learning and enjoyment of what the faculty hopes is an enjoyable as well as challenging experience.
SOAP Note Format

The following is an example of an acceptable format for hospital and clinic documentation:

Problems:
1. Endocarditis
2. *Staph aureus* bacteremia
3. CHF secondary to #1 – improving
4. Hypokalemia
5. Normocytic anemia
6. Pre-renal azotemia secondary to #3
7. Hyperglycemia – DM vs. stress response

O. VS: 112/82, T-max last 24h 101.2, RR-20, P-105; I/O-2500/1800; Pulse Ox 95% 2 LNC.
   Ampicillin/Gentamicin-day #6; Right subclavian central line-day #3
   HEENT-No JVD, central line site clean without erythema.
   Heart-tachy with III/VI crescendo/decrescendo systolic murmur with II/VI diastolic murmur and mechanical click both heard best at aortic post
   Lungs-basilar crackles
   Abd-soft, nontender with good bowel sounds
   Ext-2 mm of pretibial edema to mid-calf. Good pedal pulses
   Neuro-alert and oriented, CN II-XII intact, no focal deficits

\[
\begin{array}{c|c|c|c|c|c|c|c}
\text{Labs} & 142 & 98 & 4 & 156 & 10.2 & 10.5 & 220 \\
\text{3.1} & 24 & .2 & 30.2 & & & &
\end{array}
\]

Blood Culture: Positive-*Staph aureus*
CXR-resolving pulmonary edema

A. Patient clinically improved with resolution of fever and rigors. All data consistent with prosthetic valve endocarditis. No evidence of perivalvular leak or CHF at present.

P.
1. Continue IV antibiotics
2. Switch to p.o. furosemide
3. Increase potassium to bid
4. Check H/H in A.M.
5. Check lytes in A.M.
6. Accucheck ac and hs. Sliding scale insulin
7. Transfer to general medical floor

Staff physician’s name/your printed name and signature

This is a sample that reflects the type of patient and multitude of problems often encountered in the hospital setting. Accurate and consistent notes are essential to the care of the complicated patient. This note reflects the level of decision-making that should be incorporated into your assessment and plan. It is understood that your diagnostic and treatment plans may not always agree with staff notes. This is an acceptable part of the learning curve and every effort will be made to provide feedback to help improve chart documentation and diagnostic acumen. The “SOAP” note format offers a simple yet consistent method of record keeping.
First Day of the Rotation (Fort Worth Based Students)
Each student will participate on two different teams during two four-week blocks. All students are to report to their assigned site for orientation at 9:00 am on the first day of rotation. Students will return to UNTHSC for Orientation at 1:30 pm. This will be a brief meeting to outline expectations and answer questions. Once orientation has concluded you will begin the Wellness Rounds from 2:00 pm-4:00 pm. You will receive an email regarding location.

Last Thursday of the Rotation (Fort Worth Based Students)
Each student will participate in an exit interview session with the clerkship director on the last Thursday of the rotation. Students will be split up into two teams and attend one of the afternoon sessions (1:00 pm-2:00 pm & 2:00 pm-3:00 pm). You will receive an email regarding team and location.
How to register for MedU virtual patient cases:

NOTE: You must use your UNTHSC email address

You are required to self-register for access to MedU. After registering, you will receive an email from “i-intime@instruct.eu” with a subject line of "iInTIME New Account”. Select the embedded link in this email to complete the registration process.

Tips:

- MedU offers a single sign-on interface allowing users to use one login and password for all cases to which your institution subscribes.
- If you are currently registered for MedU cases, please do not attempt to register a second time.
- In most cases, your login is your institutional email address and a self-selected password.
- If you registered prior to December 2008, you do not need to re-register. Simply use your existing login. (An existing login may be your last name followed by a hyphen and the first two letters of your first name, ex: smith-jo).
- During your registration, if you do not receive the “iInTIME New Account” email, please check your spam filter.

To Register:

- Click the "Sign In" link at the top right of any MedU page.
- Click the "register" button.
- The iInTIME Virtual Patient cases - Registration page opens. Provide your personal information in the prompts. **Important: Students MUST use your institutional email address. If you are registering as an instructor, you may use any email address.**
- Review and accept the Site User Terms and Conditions.
- Type the security password appearing in the lower window. Click Send.
- You will receive an email from "i-intime@instruct.eu" with a link to confirm your registration. By clicking this link, you will finalize the registration process.

Note: If you are not able to register using your institutional email address, please contact medusupport@med-u.org.
**How do I change my password?**

To change your password:

1. On any MedU page, sign in with your current Login and Password.
2. Click your case selection.
3. Once redirected to the cases, select the Profile tab at the top right of the page.
4. On the Profile page, enter your desired password (you cannot change the login name). Enter it a second time.
5. Click "Save."

**What do I do if I've forgotten my password?**

If you forget your password, MedU will issue you a temporary password that will let you log in.

1. On the MedU Home Page, click "Sign in" in the top right corner. This will take you to the MedU Login page.
2. Click the "Forgot password?" link just below the "login" button and enter your login e-mail address then click "Send". You will receive an immediate e-mail sent to the email address you registered with providing you a temporary password. Use this password to log in.

**What to do if you can't log in**

Read the error message that is displayed after the login failure. If your login and/or password is incorrect, please make sure that you are a registered user and that you have typed both correctly. If you need further assistance, complete the Ask MedU Support form.

**What to do if you're registered but can't log in**

Students are required to self-register for access to MedU. If registration is accepted, you will receive an email from "i-intime@instruct.eu" with a subject line of "iInTIME New Account." This email will include an embedded link. Select the link to complete the registration process.

**System requirements for using MedU Cases**

- Desktop: Internet Explorer 11 or higher, Safari 7.0 or higher, Firefox 39.0 or higher, Chrome 47 or higher
- Mobile: iOS 5.0 or higher, most Android versions
- Monitor resolution set to at least 1024 X 768 (recommended)
