Be Visionary

ACADEMIC OVERVIEW

TEXAS COLLEGE OF OSTEOPATHIC MEDICINE (TCOM) Est. 1970

One of the nation's top medical schools for primary care, TCOM has an outstanding reputation for our innovative medical school curriculum, cutting-edge research, quality patient care, and outstanding student performance.

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES (GSBS) Est. 1993

GSBS takes great pride in shaping the future of the biomedical workforce with three areas of focus: Education, Student Services, and Research. Our PhD and MS students are the educators, researchers, and healthcare professionals of tomorrow. They also are fully engaged in innovative, ground-breaking research to tackle major health care issues such as cancer, cardiovascular disease, and Alzheimer's disease.

SCHOOL OF PUBLIC HEALTH (SPH) Est. 1999

From its inception, the School of Public Health has focused on providing critically needed public health education and research to North Texas. In addition to our exceptional curricula, we require our students to engage in hands-on public health experience beyond the classroom to ensure our graduates are well versed in all aspects of public health.

SCHOOL OF HEALTH PROFESSIONS (SHP) Est. 2004

With three outstanding programs under one roof, our School of Health Professions offers a Doctor of Physical Therapy, Master of Physician Assistant Studies, and Master of Science in Lifestyle Health and Coaching degrees. We provide the knowledge, experience and skills necessary to ensure our students excel in their chosen health professions.

COLLEGE OF PHARMACY (HSCCP) Est. 2013

The College of Pharmacy is committed to developing patient-centric pharmacy professionals trained in an interprofessional environment. We advocate a team healthcare concept coupled with optimizing health through discovery.

RESEARCH

BE VISIONARY

\$62.9 Million

Sponsored Research Awards

- » Research areas of strength include health outcomes, health disparities, human identification, healthy aging, eye diseases, and degenerative brain diseases.
- » Most productive medical school in the nation for innovation impact, as recognized by the George W. Bush Institute.
- » The North Texas Eye Research Institute is developing new and effective treatments for ocular diseases such as glaucoma, macular degeneration, and diabetic retinopathy.
- » The globally recognized UNT Center for Human Identification is the largest contributor of genetic information on unidentified remains to the FBI's Combined DNA Index System (CODIS).

INNOVATIVE RESEARCH IN ALZHEIMER'S DISEASE

- » The Health and Aging Brain study examines how factors such as diabetes, physical condition, and lifestyle contribute to cognitive problems among Mexican-American seniors.
- » Global leader in neurodegenerative translational research, including a \$45 million federal grant to study health disparities in Alzheimer's disease.

PATIENT CARE

SERVE OTHERS FIRST

61.2%

Percentage of medical students that enter primary care

The Texas College of Osteopathic Medicine is the Nation's highest ranked osteopathic medical school for primary care, according to U.S. News & World Report.

- » Specializing in primary care and prevention, healthy aging, and applied genetics.
- » Only site in Texas selected for Department of Health and Human Services federal grant to improve health care for older adults.
- » Pediatric Mobile Clinic brings primary care services to kids in under-served areas of Tarrant County.
- » SaferCare Texas is a collaborative institute focused on patient safety and reducing medical errors.
- » Only medical school in the world authorized by the Institute for Healthcare Improvement to provide training for the International Certification Professional in Patient Safety.
- » The Center for Human Identification performs forensic DNA casework, identifies human remains, manages missing persons programs, and fights human trafficking.

77,492

HSC Health clinical patient encounters (in-person and virtual visits) annually

COMMUNITY SERVICE

COLLABORATION

46,934

Volunteer hours by students,
faculty, and staff

- » HSC team members played a key role in the community in response to the COVID-19 crisis: establishing a testing site for first responders and working in partnership with Tarrant County to conduct contact tracing and oversee a public information hotline.
- » The UNT Center for Human Identification manages the National Missing and Unidentified Persons System (NamUs) as a no-cost information clearinghouse and resource center for all missing, unidentified, and unclaimed person cases throughout the U.S.
- » SaferCare Texas provides asthma-mitigating medications to eleven public ISDs in underserved communities. Providing these medications results in fewer missed school days for the students and a cost savings of more than \$1 million for the schools.
- » To prevent opioid overdose deaths in North Texas, HSC distributed 9,000 doses of Narcan and provided training for team and community members.
- » The Mobile Vision Screening Program provides no-cost screenings to Fort Worth preschoolers.
